

## EUCHNER SAFETY SERVICES

### Initial safety inspection tour through production facilities: “plant assessment”

In an initial inspection tour, our experts walk through the production facilities and prepare an overview of the machines and their installed safeguards. Our many years of experience allows us to quickly identify the key areas requiring action in the respective machine installation, as well as the problems to prioritize. With this assessment, we can help prioritize the key safety problems in the production facility and correct them promptly.

#### Advantages for the customer

- ▶ Our safety experts compile a comprehensive list of all machines
- ▶ Our customers receive an initial overview of the areas with the most urgent requirement for action

- ▶ We are committed to our customers' interests and to neutrality throughout the consultation
- ▶ As a machinery safety specialist, EUCHNER always has the latest versions of laws and standards at its disposal

#### Services for the customer

- ▶ Documentation of the key safety problems on the respective machines
- ▶ Prioritization of measures to rapidly improve the situation
- ▶ Documentation with list of machines and danger zones
