## Statement on directive 2011/65/EU (RoHS 2) and 2015/863 (RoHS 3) of the European Union

Dear Sir or Madam,

The current directive “on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS)” as of 04 June 2015 defines that the devices (industrial monitoring and control instruments) which are subject to the scope of the directive according to attachment I, category 9, have to be distributed “RoHS compliant” until 22 July 2017.

We have been working for many years in accordance with a continuous integrated management system according to the standards ISO 9001 and ISO 14001. Therefore, we observe environmental issues – as the avoidance of lead, mercury, cadmium, hexavalent chromium, poly-brominated biphenyls (PBBs) as well as poly-brominated diphenylether (PBDE) - early in the development of our devices.

Using the four additional plasticizers which were added to RoHS 3 (2015/863) (Di[2-ethylhexyl]phthalate (DEHP); butyl benzyl phthalate (BBP); dibutyl phthalate (DBP); diisobutyl phthalate (DIBP)) below the corresponding limits, apply compulsorily for devices under category 9 only as from 22 July 2021. The substitution is finished.

Monitoring of our „RoHS processes” happens according to the specifications of EN IEC 63000:2019.

**All of our devices meet the requirements of the RoHS directive!**

For further questions, please do not hesitate to contact us at reach@euchner.de

Best regards

EUCHNER GmbH + Co. KG
